Cooperation With Semray Textile

ABOUT US

WHAT IS Peshtemal?

The history of the loincloth began in Turkish baths to cover the lower part of the body. Today, it is used in Turkish baths, saunas, sports centers, beaches and for decorative purposes as a source of inspiration for our traditions and customs with its authentic structure. The loincloths produced by Semray Textile in Denizli are woven on old black looms using all rainbow colors and great effort. Standing out with its fine texture, elegance and elegance, the loincloth attracts especially the attention of women and is now used not only in baths but also everywhere where people and water come together. Since it is woven with 100% natural threads, its water absorption ability is very high. They are more practical, easier to wash and dry than fluffy towels.

OUR MISSION

As Pestemalim and Semray Textile, our mission is to meet our customers' expectations at the highest level by offering them high quality, produced from natural raw materials and carefully processed loincloths. Carrying the heritage of traditional Turkish baths, our peshtemals offer their users a perfect experience not only in baths and sauna areas, but also in sports centers, beaches and for decorative purposes.

OUR VISION

As Pestemalim and Semray Textile, our vision is to be a leading brand in the textile industry and to provide a competitive advantage in the global market by offering stylish, comfortable and environmentally friendly products that suit the lifestyles of our customers. We want to maintain our leading position in the industry with our constantly innovative approach, prioritizing customer satisfaction and quality standards.

OUR EMPLOYMENT AND PRODUCTION INFRASTRUCTURE

As Pestemalim and Semray Textile, we have a modern and hygienic production facility in a closed area of 5000 square meters. Together with our expert team of 200 people, we produce our high quality peshtemals and deliver them to our customers around the world. We attach importance to the training of our personnel and support fair working conditions.

OUR ENVIRONMENTAL AWARENESS

As Pestemalim and Semray Textile, as an environmentally sensitive company, we adopt sustainable and ecological approaches in our production processes. We aim to keep the environmental impact of our products to a minimum by using natural cotton, linen, bamboo and organic cotton threads. We try to maximize our responsibility to nature by making continuous improvements in waste management and recycling.

Every product we buy to meet our needs has its own presentation style.

If the product we buy is food, we want to touch it and make sure it's fresh, not rotten. The same is not true for electronic products. However, when it comes to fabric, just like with food, we care deeply about its quality — and we feel the need to touch it to understand it.

This touch creates a bond of trust between the customer and the seller.

However, these direct sales relationships have now been replaced by e-commerce. Customers must rely on online stores, seeing the products only through photos. Unfortunately, this creates new challenges and reduces trust in online shopping.

That's where Pestemalim Textile was born — to make a difference with its product quality and service philosophy. All of our products are woven on traditional handlooms in Buldan, a craft passed down from generation to generation for centuries. Each piece is handwoven with special designs, made of 100% Turkish cotton.

At Pestemalim Textile, where craftsmanship meets design and quality, every product is offered directly from our looms to you — bringing together authenticity, quality, and affordability.
